

## Mission of the University of Warsaw Research Data Repository

The University of Warsaw Research Data Repository ensures the secure, long-term preservation and open dissemination of data resulting from research conducted by scholars affiliated with the University of Warsaw or in partnership with the University.

The repository is part of the University of Warsaw's research infrastructure. Its mission is to promote transparency, integrity, and openness in academic research by providing tools and services aligned with international standards and best practices. It supports the development of a culture of openness in science while safeguarding the long-term preservation of deposited resources.

For data authors, the repository enhances the visibility and discoverability of their work and facilitates compliance with the requirements of research funders and scholarly publishers.

For data users, the repository provides open and user-friendly access to a wide range of resources suitable for reuse, available in standard formats and accompanied by appropriate documentation. Research data may be reused in accordance with the terms of the licenses under which they are made available.

The repository adheres to the FAIR principles, making data *findable*, *accessible*, *interoperable*, and *reusable*.
